 Real work (so this page I suppose)

Database : Video_store.sql

tblCustomers

• CustID	INT	Pk	Auto Increment
• FName	Varchar	X	
• address	Varchar	A	← Limit length - Address lines
• Phone	Varchar	A	← Valid?
• IName	Varchar	✓	Unique! Data Validation?

tblVideos

• VideoID	INT
• VideoVer	INT
• Vname	Varchar
• LgRe	Varchar
• dateAdded	Date

Data Validation

tblHire

CustID	INT
VideoID	INT
dateHired	Date
dateReturn	Date
VideoVer	INT

Why?

↳ Redundant

- Include notes on why
 I am going to change
 this database structure.
